

Navigating the Human Impact of Digital Transformation

EU Healthy Workplaces Campaign 2023-2025

The world of work is rapidly evolving. Digital technologies are not only changing how we work, but also where and when we work. This seminar will help people managers and organisational leaders navigate the world of digital workplaces and the implications for occupational safety and health.

HSA invite you to join our seminar

Where? Gibson Hotel, Dublin

When? Monday, 20th October

Time? 9.00am

Why attend?

The impact of digitalisation on occupational safety and health is still emerging. It is important to understand the potential challenges and to adapt workplace policies to maximise the benefits and address associated hazards. Attendees will hear from experts in the areas of human factors, ergonomics, psychosocial aspects and behavioural change as well as industry representatives on the topics of AI and robotics.

Who should attend?

This seminar will appeal to a wide range of leaders and managers including:

- Chief People Officers
- HR Managers
- Organisational Change Managers
- Policymakers
- OSH research community
- Safety professionals
- Public sector managers
