Is your DSE Risk Management Programme fit for today's digital workplace?

Digital work is now a feature of many workplaces, including office-based work, hybrid working arrangements and the use of digital systems across sectors such as healthcare and financial services. Join the Occupational Health Division of the Health and Safety Authority for this free webinar exploring how employers can effectively manage ergonomic risks associated with digital work. The webinar will provide an update on legal requirements, current developments relating to Display Screen Equipment (DSE), insights from recent inspections, and practical measures to help manage ergonomic risks in the modern workplace.

Key learning outcomes

By attending this webinar, participants will:

- Understand employer responsibilities under DSE legislation.
- Recognise common ergonomic risks associated with digital work.
- Learn from findings identified during recent workplace inspections.
- Identify common compliance gaps and opportunities for improvement.
- Conduct more effective DSE risk assessments.
- Implement practical measures to reduce ergonomic risks.
- Support worker health, wellbeing and productivity.

What will be covered?

- Current developments in DSE legislation and policy
- Employer duties and legal requirements
- Managing ergonomic risks in digital work environments
- Hybrid and remote working considerations
- Findings from recent HSA inspections
- Common DSE compliance issues
- Effective risk control measures
- Practical workstation and work organisation solutions

Who should attend?

- Employers and Duty Holders
- DSE Assessors
- Health and Safety Professionals
- Occupational Health Professionals
- HR and People Managers
- Safety Representatives
- Facilities and Workplace Managers
- Ergonomists, Consultants and Researchers
